

Healthy

No disease detected

Confidence	94.1%
Severity	None
Risk level	SAFE
Disease Risk Index	0.0 / 10
Spread risk	95%
Conditions	29°C · 88% RH · Clouds

Symptoms

- Uniform green colour with no spotting or mottling
- Firm, flat leaves with no curling
- Steady new growth at the tips

Suggested Treatment

- Apply Metalaxyl + Mancozeb every 7 days
- Remove and destroy infected parts
- Improve field drainage

Preventive Measures

- Plant resistant varieties
- Monitor weather conditions
- Apply preventive fungicides

Favourable Conditions

- Balanced irrigation, good airflow and adequate nutrition.

AI Advisory

- High humidity and recent fungal activity may increase disease spread.

Recommended Actions

- Use preventive fungicide
- Improve airflow
- Avoid overwatering
